

# SAFETY DATA SHEET (SDS)

			Section 1. Identif	fication					
Product identifier TPSE; TPSE CONTCENTRATED									
Other means of identification BO-1985									
Recommended use and restrictions on use Degreasser – no rinsing									
Initial supplier i	dentifier	Kosmic Surf-Pro Inc. 53	30, rue Charbonneau, S	aint-Amable, QC J0L 1N0					
		450-649-3901 & 1-877-7							
Emergency telep	Emergency telephone number/restriction on use Canada – CANUTEC 24-hour number 613-996-6666								
Section 2. Hazard identification									
Classification of hazardous product (name of the category or subcategory of the hazard class)									
Skin irritation (Category 2)									
Eye irritation (Category 2A)									
Information elements (symbols, signal words, hazard statements and precautionary statements of the category/subcategory)									
SKIN: Wash with wash it before reu to do. Continue r (following senter	ous eye irrita s/nails/face th n plenty of wa use. P305 + P3 nsing. P337 - uces not mano Dispose of co	ater. P332 + P313 If skin a ater. ## Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

## Methods and materials for containment and cleaning up

Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

## Section 7. Handling and storage

#### Precautions for safe handling

Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

### Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

# Section 8. Exposure controls/Personal protection

**Control parameters (biological limit values or exposure limit values and source of those values)** Exposure limits: CAS 141-43-5 – ACGIH – TLV-TWA 3 ppm (STEL 6 ppm) & PEL-TWA 3 ppm;

### Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

# Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Section 10. Stability and reactivity					
Reactivity					
Does not react under the recommended storage and handling conditions prescribed.					
Chemical stability					
Stable under the recommended storage and handling conditions prescribed.					
Possibility of hazardous reactions					
None					
Conditions to avoid (static discharge, shock or vibration)					
None					
Incompatible materials					
Strong oxidizing materials; etc.					
Hazardous decomposition products					
None known					

Section 11. Toxicological information				
Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact)				
Causes skin irritation. Causes serious eye irritation.				
Symptoms related to the physical, chemical and to:	xicological characteristics			
Skin irritation, redness, stinging, pain; Eye irritation, 1				
Delayed and immediate effects (chronic effects from
