

# SURF – PRO

TIME SAVER SURFACE CLEANER

## TECHNICAL DATA SHEET

Name: **The INTELLIGENT NANOTECH SEALER**

Code: BO-1205/ BO-1205-4

MADE IN CANADA

### 1.1 PRODUCT DESCRIPTION:

The Glossy Intelligent sealer for natural stones from Surf-Pro is a 100% water-based acrylic sealer with Nanotech technology. Indeed, our technology offers the possibility to obtain different level of Glossiness. More application more glossiness. It is designed to protect your natural stones but also to give a shining and rich finish.

By using it on slate, marble, terra cotta and other porous stones, it will enhance the color of these while leaving a lustrous finish. It is resistant to stains and dirt. Use only indoors. Low in VOC.

### 1.2 USES:

Use on porous stones such as slate, travertine stone, granite and unpolished marble.

### 1.3 CHARACTERISTICS:

- Ability to modify the effects of luster.
- Acrylic formula based on water.
- Enhances the colors of the stone.
- Low odor.
- Without ammonia.
- Good leveling.
- Dries quickly.
- Excellent protection against dirt and infiltration of water and oil.
- Does not contain carcinogens.

### 1.4 RESTRICTIONS:

- Avoid freezing the product.
- Do not apply on polished surfaces.
- Do not use on kitchen countertops.
- Do not apply in showers or often damp surfaces.
- The sealant will reach its full performance in 28 days after application.

**1.5 GUARANTEE:** The high quality of this product is guarantee under the descriptions available on this technical data sheet and the labels. the manufacturer guarantee is limited only on the quality of the product and to the refund price of it. this product will give total satisfaction if store and utilized in conformity with the manufacturer directives.

**1.6 NORM:** This product is low in VOC 6gr / L

### SAFETY MEASURES:

Not regulated - this product is not regulated according to the regulation on chemicals and containers of consumption (2001).

**CAUTIONS:** Keep out of the reach of children.

May cause slight irritation to the eyes and skin. Avoid contact with eyes and skin. Extremely slippery when spilled over.

### APPLICATION PROCEDURES:

**3.1 APPLICATION INSTRUCTIONS:** Shake the container before use. Wearing gloves and safety glasses is recommended during the application. Test a small area to make sure the effect is lustrous.

**New surface:** Make sure the stones are completely dry. The glossy sealer can be applied 48 hours after the grout.

Apply 2-3 coats either with a clean sponge, paintbrush or paint applicator. Allow to dry for 30-60 minutes between each coat.

**Existing Surface:** The surface must be clean, dry and free from waxes or any other finishing product such as silicone, wax or oil sealant. To know if you have a finishing product on your surface, simply spray water on the tile. If the water pearls it means that you still have finishing product. To remove the finishing product, you can use the Intelligent Glue buster of Surf-pro.

**Pre-joint sealant:** Apply a coat 2 hours before applying grout. This will prevent the grout from staining the stone.

**3.2 Covering power:** It is difficult to accurately determine the required amount of sealant for a surface. Be aware that a porous surface will require more sealant than a polished surface, also the first layer absorbs much more than the 2 and 3 layers. An 850 ml container should cover approximately 8 to 22 m<sup>2</sup> (85 to 230 sq. Ft.). The INTELLIGENT SEALER is totally dry after 24 hours but will reach its full performance in 28 days.

**3.3 Cleaning:** Hands and tools can be cleaned with soap and water immediately after use.

### TECHNICAL INFORMATION:

**2.1 Compositions:** Water-based acrylic emulsion

**2.2 Container size:** 850 ml      UPC code 775115012056  
3.78 Liters      UPC code 775115012063

**2.3 Appearance:** Whitish liquid.

**2.4 Storage:** Avoid freezing.

Store in original containers tightly closed in a dry place and at room temperature. Do not throw excess sealant on garbage. Send them to an appropriate recovery site.

### 2.5 Physical and chemical properties:

Boiling point	100 degree
Freezing point	-4 degree
Water solubility	100 %
Viscosity	N/D

**FIST AIDS:** In case of contact with eyes or skin, rinse affected areas with water for at least 5 minutes. If swallowed, drink water and seek medical attention.
